Karishma Rawal

Data Scientist

rawalkarishma062@gmail.com +918302661704 LinkedIn github.com/KarishmaRawalTech

PROFILE

Results-driven Data Scientist skilled in data preprocessing, EDA, feature engineering, statistical analysis, predictive modeling, and machine learning. Proficient in Python, SQL, Pandas, NumPy, Scikit-learn, and TensorFlow, with experience in classification, regression, model evaluation, and hyperparameter tuning. Strong ability to transform complex datasets into actionable insights and develop data-driven solutions that support business decision-making.

PROFESSIONAL EXPERIENCE

Data Analyst 10/2025 – Present
ICICI Lombard
- Analyzed lead, renewal, and conversion data to identify performance trends, gaps, and improvement opportunities.
- Tracked KPIs including lead coverage, customer contacts, renewals, and conversion across teams and regions.
- Prepared daily, weekly, and monthly performance reports and dashboards to support management decision-making.
- Collaborated with business and operations teams to validate data, translate requirements into analytics, and recommend actions to improve conversions and renewals.

Data Scientist 02/2025 – 09/2025 | Mumbai
PMaxTek
- Built and deployed a Random Forest model (84% accuracy) to predict customer churn and identify high-risk users.
- Performed data preprocessing, feature engineering, and model evaluation using Python and Scikit-learn.
- Processed and analyzed 7,000+ records through SQL and Excel to uncover key churn drivers such as Contract Type and Payment Method.
- Designed an interactive Power BI dashboard to visualize churn risk and support data-driven retention strategies

Data Analyst 02/2024 – 06/2024 | Mumbai
Imarticus Learning
- Analyzed 40K+ trending YouTube videos (Nov 2017–Mar 2018) to identify factors influencing virality.
- Performed exploratory data analysis (EDA) on engagement metrics (views, likes, dislikes, comments).
- Leveraged Python libraries (Pandas, NumPy, Matplotlib, Seaborn, Plotly) to create diverse visualizations and uncover patterns.
- Derived actionable insights on video categories, publishing trends, and audience engagement.

EDUCATION

Bachelore of Computer Application (BCA), *MLSU* 08/2021 – 06/2024 | Rajasthan

Certified Data Scientist Professional, *Imarticus Learning* 07/2024 – 01/2025 | Mumbai

SKILLS

- **Programming & Data Analysis:** Python, SQL, Pandas, NumPy, EDA, Data Cleaning & Preprocessing
- **Statistics & Analytics:** Probability, Hypothesis Testing, Statistical Analysis, Feature Selection, Predictive Analytics
- **Machine Learning:** Regression, Decision Trees, Random Forest, SVM, K-Means, Model Evaluation, Cross-Validation, Hyperparameter Tuning
- **Deep Learning & NLP:** TensorFlow, Keras, PyTorch, ANN, CNN, RNN, LSTM, NLP, TF-IDF, Sentiment Analysis
- **Data Visualization:** Matplotlib, Seaborn, Plotly, Power BI
- **Generative AI:** BERT, GPT, Hugging Face, Transformers, Fine-Tuning
- **Tools & Deployment:** Jupyter, Git, ML Pipelines, Model Deployment

PROJECTS

Project Name: CRM Analytics & Business Performance Dashboard **Tools: Power BI | SQL | Python | Advanced Excel | CRM**
- Analyzed CRM customer, lead, renewal, and conversion data to identify trends, performance gaps, and opportunities, contributing to an increase in customer retention from 7% to 25% through data-driven strategies.
- Built interactive Power BI dashboards and reports to track KPIs including productivity, contact rate, conversion, renewals, retention, and team performance.
- Performed data cleaning, validation, transformation, and reconciliation to ensure accurate reporting and actionable business insights.
- Handled and supported a large business team by leveraging data analysis and performance insights to optimize processes, improve conversions, and drive data-driven decision-making.

Crop Yield Prediction **Tools:Python, Scikit-learn, Pandas, NumPy**
Key Skills: ML Modeling, Data Cleaning, Outlier Handling, Hyperparameter Tuning, Streamlit Deployment
- Built a Random Forest model for crop yield prediction (92% accuracy with cross-validation)
- Preprocessed data from 35+ sources, handled outliers, applied feature scaling
- Tuned hyperparameters to enhance model performance and reduce overfitting
- Implemented using Python, Scikit-learn, and deployed using Streamlit

CERTIFICATES

- Databricks Accredited Generative Al Fundamentals
- Goldman Sachs: Microsoft Excel
- Microsoft: Introduction to Career Skills in Data Analytics
- PwC: Power BI
- Analytics Vidhya: Machine Learning
- Databricks Fundamentals Accreditation
- Accenture: Data Analytics and Visualization
- Hacker Rank: SQL
